Rodrigo Sebastián Palacio Schunke

BI Developer | Software Development · C# / .NET

Villa María, Córdoba, Argentina · Remote / hybrid (Villa María and Córdoba city)

rodripalacio14@gmail.com | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Systems professional with over four years of experience in Business Intelligence, automation and data integration. I develop end-to-end solutions covering SQL queries, ETL processes, data modeling, datamarts and Power BI report publishing. My experience includes provincial and municipal public finance, operational reporting and performance metrics. I complement this background with C#/.NET software development focused on backend opportunities and Palaya, my own platform actively used by three clients.

TECHNICAL SKILLS

Business Intelligence and Data: Power BI · DAX · Power Query · SQL · ETL · Data Modeling · Datamarts · RLS · Azure Databricks · Oracle Data Warehouse · Looker · Dataverse · Dynamics 365

Software Development: C# · .NET · WinForms · React · JavaScript · REST APIs · JSON · Git

Databases and Systems: Oracle · PL/SQL · PostgreSQL · Supabase · Functional Analysis · ERP · Testing and Validation

Coursework and Personal Projects: Java · NetBeans

PROFESSIONAL EXPERIENCE

BIT S.A. — ERP Implementation / Functional Analyst

April 2026 – Present

- Implement and support ERP modules for administrative, accounting and operational processes.
- Perform functional analysis, testing and validation, supporting users during implementation.
- Investigate and resolve issues using SQL and PL/SQL on Oracle, coordinating with development teams.
- Analyze business processes and configure system functionality to address operational needs.

Dirección General de Rentas de Córdoba — Data Analyst / Business Intelligence

February 2022 – March 2026

- Developed end-to-end BI solutions for public finance in Córdoba province and its municipalities, from data preparation to report publishing.
- Automated processes previously performed with Excel or KNIME, introducing SQL queries, source integration and Power BI reporting.
- Built ETL processes, data models and datamarts using Oracle Data Warehouse, Azure Databricks, Dataverse and Dynamics 365.
- Developed DAX metrics and implemented row-level security (RLS) controls.
- Published information for area leaders and external reporting accessed by 420 municipalities.
- Developed indicators for workforce management and employee performance monitoring.

Telemercado S.R.L. — Administrative Support / Citizen Services · Services for Dirección General de Rentas

2018 – 2022

- Handled administrative and tax inquiries, provided operational assistance and resolved issues.

SELECTED PROJECTS

Palaya App — Developer and Product Owner

2026 – Present · Personal Project

- Developed a multi-company platform connecting commercial websites and business management tools across different industries.
- Own the product’s design, implementation and ongoing development, working independently with AI-assisted development tools.
- Three active clients: Killa Joyas, Tres Katanas and Puerto Pizza, with branding and catalogs tailored to each business.
- Technologies: React, JavaScript, Supabase/PostgreSQL and API integrations.

Clinical Management System — C# / .NET / Supabase

Academic Project

- Developed a WinForms desktop application for managing patients, clinical encounters, surgeries and follow-ups.
- Implemented authentication, CRUD operations, validation and Supabase/PostgreSQL persistence.

Tax DataMart — Azure Databricks

- Built an analytical layer using SQL and Delta tables to consolidate tax information and simplify querying.
- Integrated registry, debt, exemption, billing and payment data.

EDUCATION AND TRAINING

Technical Degree in Systems Analysis — IES21: In progress · Expected coursework completion: November 2026

Additional Training: Data Analyst and Data Scientist — Coderhouse, 2023. SQL, R and Looker — Córdoba Ministry of Finance, 2023.

Languages: Native Spanish · Conversational English

Additional Experience: President, Córdoba Football Americano A.C., 2024 – 2026.
